About this document

This document in part of an ongoing process to assure Missouri traffic crash information and statistics is portrayed as correctly and accurately as possible. With any documents of this type, as roads, laws, vehicles and their use changes, this document will evolve. Also as the data and its statistics are examined, new edits will be discussed, developed, tested, and implemented.

This document was produced as a collaborative effort between the Missouri State Highway Patrol's Traffic, Research and Development, and Information Communication and Technology Divisions.

2.0 OVERVIEW OF EDITS

The 2012 MUCR (Missouri Uniform Crash Report) Field Specification covers accepted values, formats, and edits for the Statewide Traffic Accident Records System (STARS). Since there are multiple interfaces for this system, this document covers all the codes and edits. It is important to note that some codes and/or edits will pertain to one or more interfaces. Other codes and/or edits will be excluded from one or more interfaces. These interfaces are grouped by agency, (Patrol or non-patrol).

The values and formats in this document are specifically for the submission of the data and NOT for the printed crash report.

Fields in this document are grouped by records

Crash - contains information on the crash level. There is only one crash record per crash.

Vehicle - contains information pertinent to the vehicles and drivers involved in the crash. There can be more than one vehicle record per crash.

Person - contains information pertinent to the persons of a vehicle involved in the crash. There can be more than one person record per vehicle.

Non Vehicular Property Damaged - contains information about the property, other than vehicles, damaged. There can be more than one property damage record per crash.

Witness - Contains witness information. There can be more than one witness record per crash.

Train - Contains train information. A train is a vehicle and there may only be one train per vehicle record.

Each field is laid out in the following format.

Field Name

Description: A description of the field.

Valid Codes: states which codes are acceptable.

Format: If the field is expected in a certain format, it will be described here.

Edits:

Edit ID	Agy	Edit	Date added/changed
0.00-00	L P	A logical representation of the edit	1/1/2012

The Edit Table has the following columns:

Edit ID - a unique identifier for the edit.

Agy - The agency type that the edit applies to.

L = Non-Patrol investigated the crash

P = Patrol investigated the crash

Edit - A logical description of the edit.

Date added/changed - The date the edit was added or changed. Even though some edits predate MUCR 2012, the date added/changed defaults to 1/1/2012.

* Edits, like the codes, may pertain to certain agency types but not all. Which agency type they pertain to is documented in the Agy column.

3.0 DEFINITIONS

Motor Vehicle

Any motorized (mechanically or electrically powered) device used to move persons and/or property from one place to another and is not operated on rails, operated within the confines of a building, aircraft or watercraft, a personal conveyance, or a weapon. The load or occupants upon or in the motor vehicle, or a device being towed by the motor vehicle, are considered part of the motor vehicle.

Codes:

1 - Passenger Car	20 - Single Unit Truck; 2 Axels, 6 Tires
3 - Sport Utility Vehicle	21 - Single Unit Truck; 3 or More Axels
5 - Van (<9 W/ Driver)	22 - Truck Tractor with No Units
6 - Small Bus (9 - 15 W/Driver)	23 - Truck Tractor with One Unit
7 - Large Bus (16+ W/Driver)	24 - Truck Tractor with Two Units
10 - Motorcycle	25 - Truck Tractor with Three Units
11 - ATV	26 - Other Heavy Truck
12 - Motorized Bicycle	27 - Cargo Van
14 - Motor Home	28 - Limousine (9 - 15 W/Driver)
15 - Farm Implements	29 - Limousine (7 - 8 W/Driver)
16 - Construction Equipment / Heavy Machinery	30 - Passenger Van (9 + W/Driver)
17 - Other Vehicle and vehicle usage type is not a 5 or 7	U - Unknown
19 - Pickup	

Non-motorized vehicles

- 13 - Pedalcycle
- 17 - Other Vehicle and vehicle usage type is a 5 or 7

Driver Presence Codes

1 - Driver Present and/or Identified

This code is used for drivers who are at the scene and/ or the officer identifies who the driver was. It also includes instances where the officer knows who the vehicle driver is, but through investigation they cannot identify the driver. For instance, the driver is an illegal alien with no identification, a crash burn victim, etc. In this specific case, "unknown" should be noted in the driver's name, date-of-birth, etc. fields. The record containing the driver information is included when counting number of occupants. Validation will require driver fields to be completed per Long or Short form rules. Information for the driver is not listed in the Occupants section.

2 - Driver Present But Not Identified

This code is used when the driver is present but the officer cannot determine which vehicle occupant was the driver. The record containing the driver information is NOT included when counting number of occupants, because all personal information on all occupants is listed in the occupants section. Validation does not require driver fields to be completed.

Examples:

- 1) Fatality where all occupants were ejected and all occupants are dead.
- 2) There are multiple intoxicated persons in the vehicle, no one is in the vehicle when the officer arrives and no one admits to driving.

N - No Driver

This code is used when there is no driver, e.g., parked vehicle. Information on all occupants is listed in the occupants section, even if an occupant of the parked vehicle was setting in the front left seat. The record containing the driver information is NOT included when counting

number of occupants because all personal information on all occupants is listed in the occupants section. Validation does not require driver fields to be completed.

U - Unknown Driver

This code is used for a driver who is not at the scene and is not known, e.g., leaving the scene accident. The record containing the driver information is included when counting the number of occupants in the Veh. Validation will not require driver fields to be completed; however, all driver fields are editable so any information available may be collected.

Driver

A person operating a vehicle that may have in some way contributed to a crash. This includes unknown and unidentified drivers since their actions may contribute as much to a crash as any known driver.

Elements

<Operator>

<Engineer>

With Driver Presence Codes

1 - Driver present and/or identified.

2- Present but not identified.

U - Unknown Driver.

Commercial Vehicle

- A vehicle with a hazardous material placard displayed
- Any pickup, Single Unit Truck; 2 Axles, 6 Tires, other heavy truck, or cargo van (vehicle body type of 19, 20, 26, 27) with a GCWR of more than 10,000 pounds (1, G)
- Any Single Unit Truck; 3 or More Axles or Truck Tractor regardless of units (vehicle body type of 21, 22, 23, 24, 25)
- Any Small Bus - 9 to 15 passengers with driver, Large Bus - 16 passengers with driver, Limousine - 9 to 15 passengers with driver, or Passenger Van - 9 +passengers with driver (vehicle body type of 6, 7, 28, 30)

Involvement Type

<Operator>

This code is derived from data in Section 7a of the Missouri Uniform Crash Report (MUCR) when the Vehicle Body Type is not (13) Pedalcycle.

<Occupant>

This code is derived from data in Section 7f of the MUCR and from Train Crew Members and Passengers section of the Railway Vehicle Crash Continuation/Supplement of the MUCR field where the seat location is CP.

<Pedestrian>

This code is derived from data in Section 5 of the MUCR.

<Owner>

This code is derived from data in Section 7b of the MUCR.

<Engineer>

This code is derived from Engineer and Conductor section of the Railway Vehicle Crash Continuation/Supplement of the MUCR field.

<Conductor>

This code is derived from Engineer and Conductor section of the Railway Vehicle Crash Continuation/Supplement of the MUCR field.

<TrainCrews>

This code is derived from Train Crew Members and Passengers section of the Railway Vehicle Crash Continuation/Supplement of the MUCR field where the seat location is RC.

<TrainOwner>

This code is derived from Railroad Co. - Train fields of the Railway Vehicle Crash Continuation/Supplement of the MUCR field.

<TrackOwner>

This code is derived from Railroad Co. - Track fields of the Railway Vehicle Crash Continuation/Supplement of the MUCR field.

4.0 CRASH ELEMENTS

0.03 Agency Origination Id <AgencyOriginationId>

Description: Indicates the Originating Agency Identifier (ORI) number. It is a unique number which is assigned to a criminal justice agency. This number identifies each criminal justice agency within a county. The format is as follows: MOXXXXXX. The first three X stand for the county and the last four are the agency unique number.

Valid Codes: Valid agency ORI

APPENDIX: DECISIVE ELEMENTS

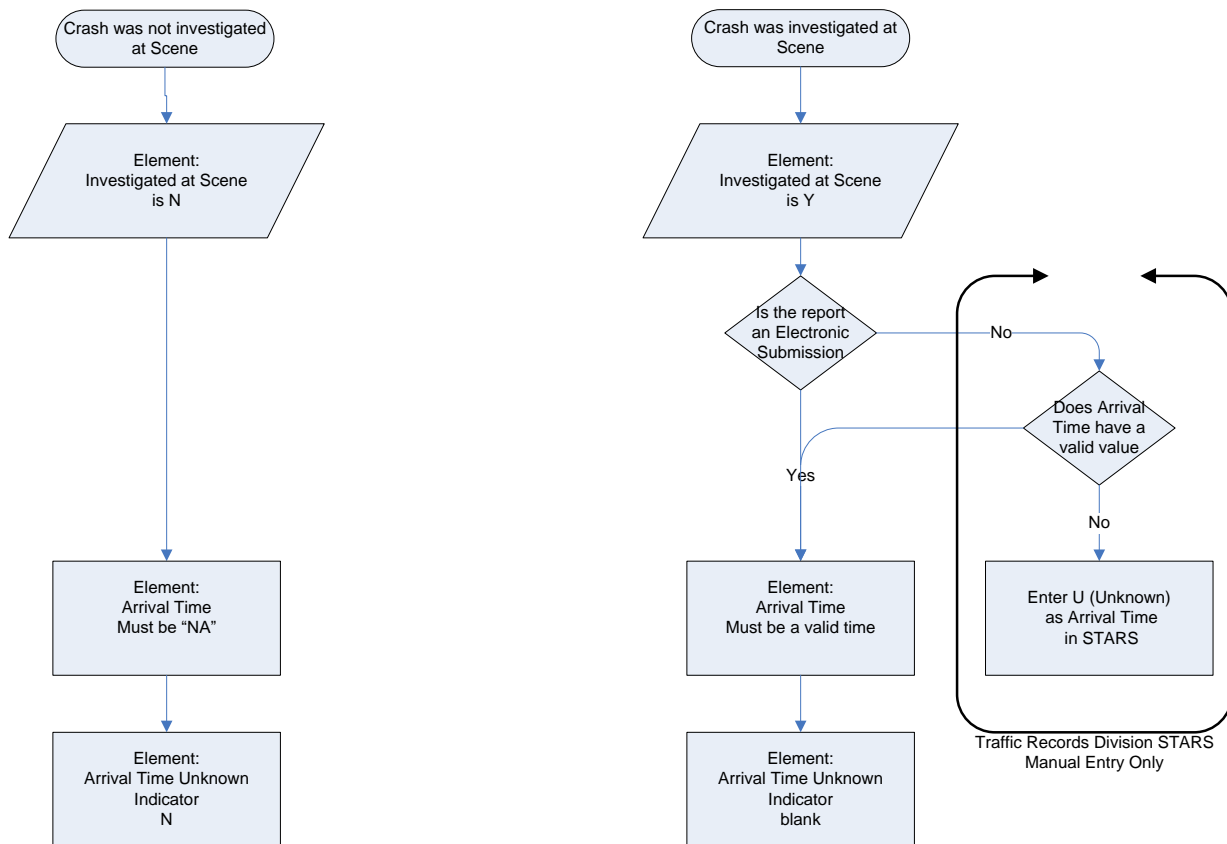

Primary decisive elements are those elements that do not have any edits depending on other elements however; its own value drives other element's edits. The following elements and the sequential flowcharts demonstrate those identified elements. They take in account the electronic submissions as well as the entry of paper reports by the Traffic Records Division where poor data quality from inaccurate or incomplete reports necessitates the need for unknown values.

Investigated at Scene

Traffic Records Division will look at both the values of the associated fields along with the narrative to try to determine if the crash was investigated at the scene when crashes are submitted as a paper record.

Investigated at Scene is the decisive element for:

- Arrival Time
- Arrival Time Unknown Indicator

APPENDIX: DEFAULT VALUES FOR NO, UNKNOWN, AND UNIDENTIFIED DRIVERS

When the Driver Presence Code is N (No Driver), 2 (Present but not identified), or U (Unknown Driver), there are default codes for certain fields that the Traffic Records Division has identified. Below is these fields for each of the three drivers types listed, and whether this code is a hard default or if it can contain other values.
